The Accessibility Plan for St Brigid's Catholic Primary School (from 2025 to 2027)

Overview

Under the provisions of the Equality Act 2010 this school recognises the need to provide adequate resources for implementing an accessibility plan and we will ensure that the plan reflects our Disability, SEND and Single Equality Policies. In line with those policies we will take the necessary steps to ensure that every young person, their families and also employees are given equality of opportunity to develop socially, work, participate and learn and to enjoy community life.

Definition of special educational needs

In this policy, 'special educational needs' refers to a learning difficulty that requires special educational provision. The SEND Code of Practice 0 to 25 Years (DfE, 2014) says children have a learning difficulty or disability if they:

- have significantly greater difficulty in learning than the majority of children of the same age; or
- have a disability which prevents or hinders them from making use of facilities of a kind generally provided for children of the same age in mainstream schools or post-16 institutions; and
- are under compulsory school age and are likely to fall within either of the definitions above when they reach compulsory school age or would do so if special educational provision was not made for them. Children must not be regarded as having a learning difficulty solely because the language or form of language of their home is different from the language in which they will be taught.

Definition of special educational provision

For children aged two years or older, this is educational provision additional to, or otherwise different from, the educational provision normally available to pupils of the same age

Objectives

- 1. Increase the extent to which SEND and disabled pupils can participate in the curriculum;
- 2. Improve the physical environment of the school to enable SEND and disabled pupils to take better advantage of education, benefits, facilities and services provided;
- 3. Improve the availability of accessible information to SEND and disabled pupils

Strategy:

- 1. The school will identify the nature of the school population including pupils already in school and moving through it and the nature of the future intake using advance information from other settings (pre-school/primary school)
- 2. The school will audit the strengths and weaknesses in working with disabled pupils to include; the level of staff awareness of Equalities legislation; areas of the curriculum to which disabled pupils might have limited or no access
- 3. The school will review the opportunities for the participation of disabled pupils in after school clubs and school visits
- 4. The school will review the building and identify parts of the school to which disabled pupils have no or limited access
- 5. The school will consider the impact on disabled pupils of the way the school is organised, for example, school policies and practices around the administration of medicines and the physical environment of the school
- 6. The school will review the ways in which information is currently provided for disabled pupils
- 7. The school will report its findings to key stakeholders without breaching confidentiality
- 8. The plan will be informed by the views and aspirations of disabled pupils themselves, their families and the priorities of the local authority

Overview - The plan:

The access plan will be very specific to this school based on the information gathered and consultation results. The plan will address the three areas of improving access to;

- 1. The physical environment The school will take account of the needs of pupils and visitors with physical difficulties and sensory impairments when planning and undertaking future improvements and refurbishments of the site and premises, such as improved access, lighting, acoustic treatment and colour schemes, and more accessible facilities and fittings. The core aim is to improve the physical environment of schools to enable disabled pupils to take better advantage of education, benefits, facilities and services provided
- **2. Access to education, benefits, facilities and services** The school will continue to seek and follow the advice of LA services, such as specialist teacher advisers and SEND inspectors/advisers, and of appropriate health professionals from the local NHS Trusts. The core aim is to always increase the extent to which disabled pupils can participate in the curriculum
- 3. Access to information usually provided in written form, and it will set out strategies for funding, monitoring, evaluating and reviewing the plan Improving the delivery to disabled pupils of information that is provided in writing for pupils who are not disabled

The definition of disability under the law is a wide one.

- A disabled person is someone who has a physical or mental impairment which has an adverse, substantial and long term effect on their ability to carry out normal day to day activities.
- The definition includes people with a Hearing or Visual Impairment, Cerebral Palsy, Muscular Dystrophy, mental health issues and incontinence. People with ADHD, Autistic Spectrum Disorder, Downs Syndrome and Hydrocephalus are included. Medical conditions such as Cystic Fibrosis, severe Asthma, Diabetes, Cancer, Multiple Sclerosis, Epilepsy, Sickle Cell Anaemia and HIV are deemed disabilities. Facial disfigurement, severe Dyslexia, gross obesity and diagnosed eating disorders are all included.
- If a person has been disabled in the past (for example, those recovering from cancer and people with a history of mental illness) they are still covered by the legislation for the rest of their life.

Access Plan
